

# CROSSFIELD CHRONICLE

VOL. XXX, No. 1

CROSSFIELD, ALBERTA, THURSDAY, NOVEMBER, 28 1935

PRICE 1.50 A YEAR

## The Very BEST at a Little LESS

JUST A REMINDER—Tons of ingredients have gone into Christmas cakes and puddings this year, some are not made yet. In case you have not made yours, our stock is complete in every line of best quality fruits and spices—buy now and don't wait as some of the essential fruits cannot be replaced.

Our stock of nuts and candies are complete in the largest variety we have had in years—the quality and prices are a knockout; after seeing our stock you will be satisfied that it is not necessary to look further—your requirements can be filled to complete satisfaction

**QUICK QUAKER OATS**, with a beautiful china

saucer and cup each ..... 28c  
**CEYLON TEA**—a fragrant strong and delicious black Tea equal to or better than at 60c tea, offered at a real special lb. .... 48c

**ECLIPSE COFFEE**—a Moca and Java blend, a golden brown of excellent flavor lb. .... 35c 3 lbs. .... \$1.00

With every purchase of a pound of Ceylon Tea or Eclipse Coffee you have a chance to secure a beautiful enamelled bread box free

**BRAIDS BIG 4 COFFEE**, lb. .... 35c 3 lbs. .... \$1.00

**SUGAR MIXED CANDY**, 2 lbs. .... 25c

**PEKO KRISP** lb. .... 25c

**CHOCOLATE DROPS**, lb. .... 18c

**CRANBERRIES**—we can still supply you with limited amount at special price of lb. .... 25c

**CONCENTRATED ONTARIO APPLE JUICE**—each bottle makes a gallon of delicious cider bottle ..... 60c

**SMYRNA COOKING FIGS**—special lb. .... 10c

## Halliday & Laut

A brand new model of Electric Radio with short wave band, six tubes, beautiful cabinet and wonderful clear tone—\$75.00 Trade in your old set

**TOYLAND** is open with a good range of toys for all from 5c to \$10.00

**ROASTERS**, for the Christmas turkey from \$1.00 to \$8.00  
**PYREX WARE**—a full line of this popular cooking utensil at greatly reduced prices.

## Wm. Laut

## For Winter Comfort

Have Baker's check your Ignition, Carburetor, Fuel Pump, Tune Up Motor and if necessary a Valve Grind.

**HEATERS, ANTI-FREEZE, BATTERIES**  
**HOOD COVERS, DEFROSTERS.**

## Alberta Leads At Toronto

With Albertans placing at or near the top of so many classes at the Toronto Royal, the Fair would seem to be in danger of having its name changed to Alberta Royal. Led by Howard P. Wright with his wheat championship and Frank Collicutt with several placings in the Hereford classes, Albertans practically "ran away" with the major awards in both grain and livestock.

Another outstanding feature of Alberta's successes is the noticeable number of young exhibitors. This speaks well for the future of agriculture in this great agricultural Province. It is also a tribute to the officials of the Department of Agriculture for the ground work and assistance they have given.

## Donnie's Big Year

Donnie McFadyen scored one goal and assisted in the other three in a game last Friday when the Chicago Black-Hawks defeated the Toronto Maple Leafs 3 to 0. Donnie has scored or assisted in seven out of the thirteen goals scored by the Hawks so far this season. That Thompson—McFadyen—Romnes line seem to be hard to stop. Only three other players in the leagues have a higher number of points than Donnie and two of them are the other members of this fast stepping line, the third being Charlie Conacher of the Toronto Leafs.

## Newly-Weds Shivered

A large group of both young and old swooped down on the home of Sam Fleming last Thursday evening for the purpose of shivareeing the newly-weds, Mr. and Mrs. Rowland Fleming.

After raising the usual din and giving the bride and groom quite a scare, they were invited into the house. The house however proved inadequate for the number present so they wended their way to town and secured the Masonic hall where until the small morning hours they enjoyed lunch, music and dancing.

## Curlers Enjoy Supper

The losers in the recent curling competition were hosts to the winners at an oyster and chicken supper at the Oliver Cafe Thursday night. The supper was real good and was enjoyed by all, even the losers.

After the supper a general round table discussion took place regarding the Calgary Bonspiel, the MacDonald Brier Competition and rebuilding the rink on a much larger scale. The rink now contains two narrow sheets, being only 12 ft. wide, while the thought is for three 14 ft. sheets.

## Wright Takes Canadian Title

Congratulations are due to Howard P. Wright on his success at the Toronto Royal, where he took the Canadian wheat championship with his sample of Red Bobs 222, which weighed 60 lbs to the bushel.

This success is all the more outstanding when you consider that the year 1935 produced so much low grade grain on account of the hail, drought and that August frost.

The citizens of Alberta generally and those of the Crossfield-Aldrie district particularly, will wish Mr. Wright further success when he takes his sample of wheat to the Chicago International.

## Dr. Price Goes To Rochester

Dr. W. B. Price V.S. of Calgary, formerly of Carestair, who has been seriously ill in a Calgary hospital for some time, was taken Sunday evening to Mayo Bros. at Rochester, A. Gough and T. D. Sutherland were down to see him before he left. The Thoroughbred Horse Breeders Association passed a subscription hat around to make this trip possible and we understand that about \$800.00 was collected. \$35.75 was sent in from the Crossfield District.

## Cars Crash At Crossroads

What might have been a very serious accident, occurred on the main highway Tuesday noon, at the North end of town, but fortunately no one was hurt. Herb Stewart Jr. and his brother Bob, driving East in their heavy grain truck, were about to cross the highway as Swan Anderson of Benalto accompanied by his wife and a neighbor, in a 1932 Chevrolet, approached the intersection from the North. Herb said he looked North after crossing the Railway but did not see the car and was looking south when Mr. Anderson's car crashed into his left front wheel and fender. Mr. Anderson said he saw the truck but expected him to stop or turn South, until 21 ft. from the truck, when he applied his brakes and swerved the car East. Fortunately for all concerned, the road was icy under the truck and it veered off, going through the ditch and the fence. The car went into the ditch on the south side of the road going East, and is almost a total wreck. The Stewart truck suffered a cut tire, bent fender and bumper.

Corporal Cameron was immediately called and after viewing the situation, laid a charge of reckless driving against Mr. Stewart, who, appearing before Magistrate A. W. Gordon, pleaded guilty, and was fined the minimum of \$15.00 and costs.

No charge has been laid against Mr. Anderson, as yet, but Corporal Cameron is making further investigations.

No collision insurance was carried on either vehicle.

## Legion Holds Social Evening

The Legions monthly social evening, held in the Masonic Hall on Monday, was fairly well attended. The playing was keen and the bidding strong, which makes an interesting game. Mrs. N. Tweedle took high honors among the Ladies with Mrs. L. Nichol second. The gents honors going to D. J. Hall with N. Tweedle second. After a very tasty lunch, the tables were moved and they tripped the light fantastic until the wee small hours.

## Former Resident Gives Paper

Peace River, November 11th. Snow blocked roads out the attendance at the annual convention of northern teachers held here. Teachers as far as Notikewin and High Prairie met to hear discussions on subjects relative to their profession.

A subject that found popular favor and produced more discussion than any other was "the proposed new course of studies for elementary grades," by Mrs. M. L. O'Brien of Stewart school.

Mrs. O'Brien was formerly Miss Mary McAnally, daughter of Mr. and Mrs. P. I. McAnally of Crossfield.

## His Master's Word

Hon. W. A. Fallow, Minister of Public Works, Railways and Telephones, while addressing the convention of the Alberta Association of Municipal Districts last Friday, stated, that the Government would have to halt highway building for the present on account of the financial situation, for he says, "this money has to come from somewhere here, but where? A delegate immediately suggested, "make it with a fountain pen."

This delegate only re-iterated a statement made many times during the election campaign by Premier Aberhart, but when he was asked the same question as Hon. Mr. Fallow now asks, Mr. Aberhart would laugh and say, "what a foolish question!"

No wonder he told his followers at the "thanksgiving meeting" on the Friday night after the election, that, "now we are elected we must be more careful what we say."

## Week-end Specials

Dates, Sair per pkt	-	25c
Figs, Arabian per lb	-	16c
Glace Cherries, per 1-2 lb	-	28c
Cut Mixed Peel, per 1-2 lb	-	15c
Mince Meat, per lb	-	17c
Currants, 2 lbs	-	29c

## Push Sale Of Canadian Wheat

Western Canadian farmer organizations are on the right track in taking steps to launch a well defined and co-ordinated program of publicity with the promotion of greater consumption of high grade wheat in customer countries as its objective.

Within a period of a couple of weeks two of the large farmer marketing organizations have given their blessing to such a move. These are the central organization of the Canadian wheat pools, whose plan to place an all-Canadian wheat loaf before the British consumer was endorsed at the annual meeting of the Saskatchewan Wheat Pool delegates and the United Grain Growers Ltd., who, at their annual meeting in Winnipeg sponsored a publicity program for Canadian wheat overseas.

Briefly, the U.G.G. Ltd. propose to interest boards of trade and other organizations throughout the British Isles to sponsor a program to the Federal government to set up a special sales promotion body to be known as the Canadian Wheat Institute with offices in consumer countries, the objective being to develop greater consumption of high quality wheat, which, of course, means wheat grown in Canadian fields.

The necessity for stimulating overseas consumers' interest is cited in the following quotation from the directors' report at the annual meeting of the Saskatchewan Wheat Pool: "In spite of the fact that Great Britain remains the best Canadian overseas customer for Canadian wheat, our wheat is invariably used only for blending with other wheats, particularly in the English mills. The British people generally are not familiar with the high quality of bread which can be baked from Canadian flour."

In support of the argument that a publicity campaign should be conducted in Great Britain, figures were quoted at the U.G.G. convention to the effect that while world consumption of wheat has dropped 31 per cent. in the past five years, Canadian wheat exports have been lowered by 49 per cent. in the same period.

While this may be true, it does not necessarily mean, however, that Canada is not holding her own in competition with other wheat exporting countries as total exports have dropped faster than total consumption due to the self-sustaining efforts of a number of the former customer countries in Europe. It does demonstrate, on the other hand, a material reduction of consumption of wheat, during the period under review.

Unfortunately, there is evidence that there is actually a reduction of consumption of wheat in Great Britain, Canada's best customer for high grade wheat. Representatives of the Scottish Co-operative Wholesale Society, while in Western Canada this summer, testified that while the Scotchman insists upon bread made of wheat of high protein content, as a result of which bread sold by the Co-operative's affiliates and subsidiaries contains 83 per cent. Canadian wheat, he is also eating less bread than formerly and, incredible though it may sound, is consuming less porridge. The Canadian is substituting more expensive fruit, bacon and eggs and other costliness, for a percentage of his erstwhile substantial diet of bread and oatmeal.

There are indications that a similar situation exists in England, where the popular taste is for a lower grade loaf than the Scotchman demands, for within the past year the British millers have found it advisable to institute a five-year advertising program at considerable expense in an effort to persuade the population south of the Tweed and the Cheviots that they should eat more bread.

With many of the former markets virtually closed to Canadian wheat and the British market showing a tendency to shrink, due to changing dietetic tastes, or whatever the cause may be, the outlook is not reassuring to the Western Canadian farmer.

The farmer organizations are becoming alive to the need for taking some steps to deal with these conditions and it is to be hoped that some effective program can be devised with all interests working together to a common aim.

In some quarters it is suggested that this is an opportunity for the Canadian Wheat Board to take the initiative in co-operation with the Department of Trade and Commerce. It is pointed out that the Wheat Board, under the Canada Wheat Board Act, is vested with wide enough powers in section 8, sub-section B, which gives the board authority "to sell and dispose of" wheat from time to time and it is heard may acquire for such price as it may consider reasonable with the object of promoting the sale and use of Canadian wheat in the world markets.

Some recent experiments in the home market show that the public will respond to a loaf made more attractive by flavoring or other devices and it is possible that similar efforts to woo the British consumer would pay dividends. At any rate it is worth a trial.

### Soil Survey

During the past summer the Manitoba Soil Survey under the direction of Professor J. H. Ellis of Manitoba University has made a reconnaissance soil survey of approximately 1,774,080 acres in the drought area of southwestern Manitoba.

### Canada's Chief Loss

In the event of Italy retreating by refusing to buy from Canada the chief loss would be in wheat, according to the exports for the last fiscal year when wheat to the value of \$1,996,024 was shipped to that country.

The invisible larvae of the clothes moth, and not the moths themselves, do the damage to clothing.

**VICKS VAPOROL**

### Terminates Annual Gifts

Rockefeller Believes Sectionalism In Church Is Wrong

Forfeaking the traditional practice of his father, John D. Rockefeller, Jr., has terminated his annual monetary gifts to the Northern Baptist Church in the belief that inter-denominationalism is the best service of Christian religion.

In a searching letter to the Northern Baptist convention, written March 7 last, but revealed only recently, the son of the founder of one of the world's greatest fortunes informed the church that henceforth any future gifts would be only to specific agencies of the church.

"I have long felt," he wrote, "that this denominational emphasis is a divisive force in the progress of organized Christian work and an obstacle to the development of the spirit and life of Christ among men."

To hold young people, Rockefeller said, who are largely unconcerned with denominational distinctions, the church must work with them "in relegating the non-essentials to a place of secondary importance and stand with them for the fundamentals of Christian duty."

Rockefeller, the largest individual donor to the church, has in the past made annual donations ranging from \$250,000 to \$1,000,000 to the general budget of the Northern Baptist convention.

### Made Noise Like Plane

Swarming Wasps Routed Pack Trains In B.C. This Year

Wasps were numerous throughout British Columbia this year. Hundreds of nests honeycombed the rocky ground of the Cariboo district and on Vancouver Island.

"You could stand still anywhere in the woods, listen quietly, and hear a humming like a flock of distant aeroplanes," a logger in the Courtenay district of Vancouver Island reported.

He told of finding an area where a bear had demolished a dozen nests in the space of a quarter of a mile, feasting on the young wasps it found.

Many nests were situated on the Forbidden Plateau and pack trains were often attacked by the stingers. Horses rear and plunge as the swarms sail in to the attack. The stings cause the horses to stop for a few minutes, however, and they are soon quietened.

### Unique Picture Gallery

Has Been Hobby Of Hotelkeeper For 35 Years

Trail, a little mining town in British Columbia, boasts a unique picture gallery. It is owned by Pete Levesque, a hotelkeeper, who has made it his hobby for 35 years, and it covers every inch of wall space in his lobby.

The gallery includes a photograph of every prominent man or woman who has visited Trail since 1900, and many of the photographs are autographed. All carry a short biography of the subject in Mr. Levesque's spidery writing, each ending with the word "died," followed by a blank space to be filled in when time comes. Some of the subjects have thought this meticulous attention to detail a trifle premature.

### Making It Clear

Moss knocked the ashes from his cornucop pipe and put it on the mantelpiece. "Mandy," he said, "I think I've given you on mah best clo's on go down to the theatre tonight to see de chorus ladies dance."

Mandy turned a stony eye on him. "Moss," she grumbled, "listen here. If dat am what you thinka, den you'd better think agin. Niggah, you ain't gwine to put on nothin' to go no place, no time, to see nobody do nothin'; never, now, and not at all. Does yo' understand?"

The golfer had lost his ball, and, not unnaturally, was inclined to be annoyed with his caddy.

"Why didn't you watch where it went?" he asked.

"Well, sir," said the boy, "it don't usually go anywhere, and so it took me unprepared like."

In addition to ancient eggs and birds' nest soup, the Chinese are particularly fond of dogs' flesh marinated from roses, preserved oysters, ducks' gizzards, and canned earthworms.

Fish can be kept fresh for three months by means of a new process of brine freezing perfected in England.

In case you are interested, the salary of a member of parliament is \$3,600.

Some people are noted for their ability to recollect things that never happened.

If You Eat Starches Meats, Sweets Read This

They're All Necessary Foods — But All Acid-Forming. Hence Most of Us Have "Acid Stomach" At Times. Easy Now to Relieve.

Doctors say that much of the so-called "indigestion," from which so many of us suffer, is really acid indigestion... brought about by too many acid-forming foods in our modern diet. And that there is now a way to relieve this... often in minutes!

Simply take Phillips' Milk of Magnesia after meals. Almost immediately this acts to neutralize the stomach acidity that brings on your trouble. You "forget you have a stomach."

Try this just once! Take either the familiar liquid "PHILLIPS" or, now the convenient new Phillips' Milk of Magnesia Tablets. But be sure you get Genuine "PHILLIPS".

Also in Tablet Form: Phillips' Milk of Magnesia Tablets are now on sale at drug stores everywhere. Each box contains 12 tablets. The first of a teaspoonful of water.

MADE IN CANADA

PHILLIPS' Milk of Magnesia

English Language Changes

Words Drop Out And Come Into Use Again

A sign of the way in which the English language changes is seen in the use of the word "tremble" when describing earthquakes. In the last few days it has frequently appeared in news dispatches, but we were unable to find it in the Shorter Oxford English dictionary or in the Century, though we thought it would surely be in the last.

We could find "tremble," that is, one who trembles, and "tremor," that is, an agitation of the limbs, or of the earth, but no "tremblor." The Century dictionary quoted J. Milne's use of the word "tremor" as follows: "Modern research has shown a typical earthquake to consist of a series of small tremors succeeded by a shock or series of shocks."

The word was not in the body of the text of Webster's New International dictionary, either, but it was included in the footnotes, and this is what we read: "tremblor—erroneous for tremor." And what is "tremor"? It is Spanish for earthquake, says Webster. From an old dictionary, the Standard, published in the nineties, we got a little more information. It contained "tremblor"—the word there has an extra "r"—which were defined as "tremors of the earth's surface in volcanic districts." The word is Spanish, from "temblar"—without the "r"—meaning tremble. It was derived from South America.

Apparently it was in common use in America in its "erroneous" form, at the end of the last century, then dropped out of current speech, and has now made its reappearance, just like a dandelion in a lawn—Hamilton Spectator.

### Java Has No Poor

Native Diet Is Frugal And Everyone Has Enough

Speaking of the world tour of Lord Baden-Powell and herself which recently concluded with their visit to Canada, Lady Baden-Powell mentioned their stay in Java, and added: "I might say there isn't a poor person in all of Java. Of course the native diet is frugal—a handful of rice and a couple of bananas is sufficient each day. But we could learn a lot from the attitude of these Eastern people. Their kindness, their friendly spirit and their goodness shine from their eyes."

### More Statistics

"When one gets a piece of dust in his eye he should remember that the earth weighs 8,885,518,000,000,000,000,000 tons," says The St. Thomas Times-Journal, and the London Advertiser remarks it might also help to recall that there are roughly 2,000,000,000 people in the world ready and willing to pluck notes out of other folks' eyes.

The moon sometimes comes 30,000 miles closer to the earth than at other times. It does not travel in a perfect circle around the earth.

Arithmomania is a strange malady. The sufferer is obsessed with uncontrollable desire to count things.

Tung oil has been important in China over 5,000 years.

### Poultry Congress In Leipzig

Exhibit Building In Berlin Was Destroyed By Fire

Owing to a serious conflagration in the city of Berlin, Germany, the large building in which the live bird exhibit of the Sixth World's Poultry Congress was to have been held in 1936 was destroyed by fire. As there was no other hall in Berlin large enough for the purpose, the Congress authorities decided to hold the Congress in Leipzig. According to official information, this arrangement will give better accommodation than was possible in Berlin, while at the same time the delegates will have every opportunity of seeing the sights in and around Berlin itself on the occasion of a pre-arranged visit. Provision is also being made for the delegates to visit the Olympic Games, which will be held on the outskirts of Berlin. A Canadian tour is being arranged, and already there have been some definite bookings and a large number of applications for information.

### Propane Gas Has Many Uses

Can Cool A Refrigerator Or Run A Motor

One of the products of oil and gas wells is a condensable gas, propane. Under compression it is a liquid, but if released to atmospheric pressure it becomes a gas. When it changes from a liquid to a gas it has properties similar to dry ice, solid carbon dioxide. It has frequently been suggested that propane could be used for a dual purpose with completely opposite effects. It could first be evaporated from the liquid state through coils of pipe to cool a refrigerator and the vapor could then be run to a gas stove, where it could be burned as fuel. A parallel application applies to motor trucks transporting perishable foods is described in "Food Industries." The propane is first used for refrigerating the body of the truck and is then used as fuel for the motor instead of gasoline.

### Told Astonishing Story

Fishermen On Caspian Sea Marooned For Five Days

Thousands of Caspian fishermen told an astonishing story of having been marooned on the bottom of the sea for five days, dispatches to Moscow stated.

Their report was that at the busiest period of the fishing season the sea itself retired from under the fleet.

It receded along 150 miles of the northern shore line of the Caspian Sea, leaving the ships high and dry several kilometres from solid earth.

### Increase In Dairy Herds

A survey of farms on the Lethbridge Northern Irrigation area shows an increase in dairy herds and a steadier level in prices for cream. There are altogether 3,500 cows of which about 2,400 are Holsteins in the district, but with 100,000 acres available these numbers are capable of considerable increase.

### Took Name From Islands

The Canary Islands were called "Canaria" by Pliny, because of the multitude of dogs of great size found there. The domesticated canary took its name from the island, and not the islands from the bird.

The large, white, funnel-shaped "blossoms" of the calla lily are not the true flowers at all, but outer leaves. The real flowers are tiny, inconspicuous things, crowded together on the club-like spadix in the centre.

It has been estimated that twice as many boys as girls figure as victims of road accidents, while eight times as many boys as girls are drowned.

The poisonous toadstool and the edible mushroom are of the same family.

The hardest job a clerk ever tackled is trying to sell woman something that can't be exchanged.

Don't forget that you are a part of all of the people who can be fooled some of the time.

Don't "Chisel" Yourself

Don't "chisel" yourself, when for so little you can get the best. You have always enjoyed Ogden's and now that times are better, you get back to Ogden's and pleasure.

And don't forget to roll it with the best papers "Chanticleer" or "Vogue".

Your Pipe Knows Ogden's Cut Plug

### Unique Design For Windows

South Africa's New Post Office Using Replicas Of Stamps

South Africa's new post office which is now under construction is to have stained glass windows in the form of enlarged replicas of the Union's halfpenny, penny, twopenny and fourpenny postage stamps. Interwoven with the stamp designs are representations of a streamlined train, aeroplane, a motor ship, and a radio station emitting sparks. A pair of symbolic poles help to balance the design which are supported by medallions, sketches of mail coaches and other old methods of postal transport.—L. A. Barnes.

### To Learn English

In the last two years nearly 4,000 foreign girls have gone to England to become domestic servants, most of them being well educated and of good family, but adopted this means of improving their knowledge of English.

Asia, with its 16,700,000 square miles, is the most populated continent. It has more than 954,000,000 inhabitants, or over half the population of the world.

About 80 per cent. of our drinking water is treated with liquid chlorine to destroy the harmful bacteria.

The hardest job a clerk ever tackled is trying to sell woman something that can't be exchanged.

Don't forget that you are a part of all of the people who can be fooled some of the time.

## Geological Surveys And Investigation Program Have Brought Results

Hitherto unclassified regions believed favorable for gold production in the west and copper-nickel mineralization and natural gas-petroleum areas in the east have been disclosed this year by the federal \$1,000,000 geological surveys and investigation program, Dr. Charles Cammell said at Vancouver.

Although the geologic parties have not yet had time to compile their complete reports, the program has been successful in classifying these unknown districts, the deputy minister of mines told delegates to the western meeting of the Canadian Institute of Mining and Metallurgy.

The program, which got under way last June, embodied 65 projects spread over the Yukon, Northwest Territories and every Canadian province with the exception of Prince Edward Island. Close to 1,000 persons were employed in the 188 field parties which engaged on the geological and topographical surveys.

The reconnaissance of the Yellow Knife river district in the Northwest Territories disclosed approximately 2,900 square miles, or 30 per cent of the area, could be classified as gold prospecting territory, the deputy minister said.

Another project indicated some 200 square miles in Manitoba could be considered favorable for gold occurrence, and some unprospected areas with similar possibilities were found in Saskatchewan.

The party working in the Cranbrook area of British Columbia found that tests should be made of certain tertiary gold-bearing gravels which have been given careful consideration, Dr. Cammell said, while examination of mining properties in the vicinity of the main line of the Canadian National Railways in the coast province has directed attention to the economic possibilities of the region.

In the east perhaps the finding of copper-nickel mineralization of the Sudbury type in sporadic occurrences over a distance of 14 miles in an area southwest of Fort William-Fort Arthur can be considered as one of the most interesting attainments. In addition, the same project disclosed some 300 square miles favorable to the occurrence of silver.

Surveys in the natural gas-petroleum region of southwestern Ontario indicated additional favorable areas in which to drill for gas, the minister stated.

Solution of the scarcity of water for domestic and agricultural use in the southern prairie region of western Canada may hinge upon sources of artesian and ground water, Dr. Charles Cammell stated. The prairie water problem was one of the largest individual undertakings under the \$1,000,000 federal geological and topographical survey recently concluded.

Nothing would be known, Dr. Cammell said, until the various parties had completed their reports.

### Alberta Buffalo For Germany

Collection Of Live Moose And Buffalo To Be Shipped Soon

Collection of live moose and buffalo from Alberta and an exhaustive research into the habits, biology and derivation of big game here has been completed by Dr. Lutz Heck, director of the Zoological Gardens, Berlin. Between eight and 10 moose and 18 and 20 buffalo from Wainwright will be shipped to Germany to be used for experimental breeding purposes to improve native game, the baron explained.

Preservation of big game throughout the world for posterity is sought by Dr. Heck. As soon as his scientific data has been completed and the results analyzed the professor will release the information to the Canadian government as well as his own government for "their mutual benefit."

### Elderly Information Man

Old-Timer Gives Offhand Historical Dates And Local Statistics

"Uncle Joe" Uloth, 92 years a resident of Guyanboro county, N.S., is his district's unofficial "Who's Who." He knows all the old-timers for miles around by their first names, knowing their children and their grandchildren. He can give offhand birthdays, historical dates, dry and wet years and most local statistics.

None of this information is kept anywhere but in "Uncle Joe's" head. He says he thinks about it while he works. And speaking of work, this year he planted and looked after more than five bushels of potatoes and sowed four cords of wood.

### Maritime Freight Rates

Council Declares Freight Rate Act Is Unconstitutional

Ontario counsel opposing an application before the board of railway commissioners for Canada at Moncton, N.B., created a sensation by flatly declaring the Maritime Freight Rates Act was unconstitutional. The "preliminary objection" came from Joseph Sedgwick, K.C., representing the Ontario department of agriculture at the hearing of the maritime transportation commission's application for a reduction in potato rates.

"I am a little afraid to answer my friend now," responded C. J. Burroughs, K.C., Halifax, counsel for the commission. "Afraid that if I said what I would like to say I would say too much. So I'd better think over what I am going to say. I say just as quietly as I can that Ontario is still part of Canada. It is not a foreign country. Hereafter, we have we have had entire sympathy from the great province of Ontario as well as hearty sympathy from Quebec in our problems down here."

Mr. Burroughs had outlined a claim for extending to the maritime provinces a reduction of three cents a bushel, granted in the freight rate on potatoes to and from points in Ontario and Quebec. The case was entered primarily as a test of the validity of section eight of the Maritime Freight Rates Act, which gives a 20 per cent reduction in freight rates. The section provides that this advantage is to be maintained.

### Punishment Fits Crime

Sentence Given Boys By New Jersey Judge Seems Wise

Three 16-year-old boys in Montclair, New Jersey, are going to have plenty of scope to exercise their bent for mechanics in the next year. Following an accident they were caught operating a motorcycle with a 1933 plate painted to look like a 1935 license. The boys explained they had an "irresistible impulse toward things mechanical."

That sounded like a good excuse to the judge, so instead of sending the boys to reform school, he sentenced them to spend every Saturday afternoon for the next year in the police garage, where they will wash, grease and help repair the police cars; they will also pay fines of 50 cents each per week for the year, and on Monday and Wednesday evenings they will attend night classes in automobile mechanics.

The trio will get a good training and they will be able to exercise to the limit their yen for tinkering with things mechanical. In fact, by the time the year is up the boys may be so tired of washing and greasing cars, they will be sorry they strayed from the straight and narrow. Further, there will be no heroes about washing and greasing a car under police supervision. The boys cannot pose as bold, bad men. Instead they will be quite chastened—Windsor Daily Star.

### The Value Of Experience

Lessons We Learn Can Never Be Set Aside

One thing must not be forgotten in the welter of new creeds and shifting moral ideals that characterize modern thought. That is that the lessons of experience cannot be set aside. The ideals that have emerged through centuries of human struggle are as fixed for our practical guidance as the stars by which we determine our calendar and steer our ships. The deep faith in which generations of thoughtful men have found strength and comfort is as valid still. Life, after all, is simple. If we live it simply. All that is required of any man is that he be true to himself, loyal to his obligations, great hearted and kind in his relations with neighbors—Minneapolis Journal.

### Huge Clock For Airport

The world's largest horizontal clock, which is 30 feet in diameter, operated with Big Bear's 22 foot 6 inches, was tested before shipment to the new Rand airport, South Africa, where it will be visible to airmen flying at a height of 3,000 feet.

The longest of all regular English words is "antidisestablishmentarianism," which means "a doctrine of opposition to disestablishment."

Sound travels faster in warm weather.

## The SNAPSHOT GUILD

MAKE A SILHOUETTE

Silhouettes make excellent greeting cards, book plates, and place cards.

With the arrival of cooler days and nights that do not offer much encouragement for outdoor activities, there is a very noticeable increase in interest by amateurs in snapshots. With this type of picture, even more than with ordinary snaps, it is important that the pictures tell their own story—unless, of course, you want simply during the long evenings of fall and winter.

All of us are familiar with the ordinary type of snapshots but few have made silhouette pictures. With this type of picture, even more than with ordinary snaps, it is important that the pictures tell their own story—unless, of course, you want simply during the long evenings of fall and winter.

The first essential of silhouette pictures is a perfectly flat background, devoid of detail. And the easiest way to obtain such a background is to stretch a bed sheet across a broad doorway between two rooms. It's important that the sheet be tacked up so that all creases and wrinkles are eliminated.

To light up this background, a strong light must be put in back of it, about five feet away, either centered or placed directly back of the major feature of the picture. You have a wide choice of lamps for your lighting. You can use a couple of

ordinary 60-watt bulbs such as you use in your home lamps, or a Photo-flood or Photoflash bulb. The latter are available at most electrical or photo supply shops at very low prices. The Photo-flood bulb, which gives an exceptionally brilliant white light, is probably your best bet. Its life is about two hours of constant burning, but it can be used for many pictures. Pose your subject about two feet in front of the sheet (on the side away from the light). See diagram. Place your camera on a tripod or table so that it is directly opposite your subject. When the picture is taken, the light that illuminates the sheet should be the only light in either of the rooms.

Now about the exposures. If you use the two 60-watt lamps, you will need an exposure of about 10 seconds, with the lens wide open, with a Photoflash, a couple of seconds will suffice. Using the Photoflash (which gives an instantaneous vivid flash of light) set the shutter at "time," turn out all room lights, open the shutter, flash the bulb, close the shutter—and there you are—you've got your picture.

Now practice with silhouettes is a worth volume of instruction. Good silhouettes make excellent material for greeting cards, book plates, place cards, and so on. In making them, you can call on your ingenuity and inventiveness into play. Try it tonight!

JOHN VAN GUILDER.

### Not in Same Class

Between Unemployable And Unemployed There Is Big Difference

Hon. Frank Carrel, in Quebec Chronicle-Telegraph says:

In considering the number of unemployed we must not forget those who never worked, those who lived on others, those who were too lazy, and those who lived by their wits in fleecing others. They are all numbered among to-day's unemployed. How many of this class will ever be converted to work is hard to say, but one assumed fact stares them in the face. They will not find such an easy time in the world from now on as they did before the depression.

### Sowing Rice From 'Plane

Method Carried Out In Russia On Large Scale

Visitors to the Ukraine have been surprised to see airplanes swooping over the fields and bombing them with rice. This method of sowing has already been tried out with some measure of success in other parts of Russia, and it is now being carried out on a much larger scale. Sowing by airplane has one great advantage. It can be done when the earth is still sodden and ordinary sowing implements would be useless.

Domestic radio-telephone service has just been inaugurated in China.

### Dish Towels Needn't Be Dull

The bride—so proud of her new home—that friend who's collecting linens for her hope-chest—your mother or mother-in-law, both of whom like a bright, cheerful kitchen—these are just a few of the many on your gift list who would love one or a set of these gay cross-stitched towels. You will enjoy working with such attractive designs, too, and find that the eight-to-the-inch crosses are quickly done.

In pattern 5197 you will find a transfer pattern of six motifs averaging 4 1/2 x 8 inches; material requirements; color suggestions; illustrations of all stitches used.

To obtain this pattern send 20 cents in stamps or coin (coin preferred) to Household Arts Dept., Winnipeg Newspaper Union, 175 McDermott Ave. E., Winnipeg.

There is no Alice Brooks pattern book published

## Australia Is Said To Be The Third Best Customer Of Canada

### Canadian Cattle At Glasgow

High-Grade Shipment Brought Satisfactory Prices At Sale

There was plenty of evidence that Canadian cattle are popular in Scotland at a special sale conducted recently by Wm. Bosworth and Sons, at Meriklands Wharf, Glasgow, to dispose of a shipment of Canadian beef and dairy cattle. Bids came freely, and all the animals were disposed of at satisfactory prices.

The auctioneers stated that the dairy cows were the first lot offered for many months, and were of excellent types and breeding. In order to ensure that only the very best cattle of Canadian cows would be exported, the Canadian Government had imposed strict regulations providing that all cows for export to the British market must pass an official tuberculosis and blood test prior to shipment. Any cows failing to pass such test will not be allowed to leave the Dominion. Further action by the Canadian government provided for skilled supervision of all export shipments as to class, breed, type, and conformation of the animals to ensure that only high-class stock went to the British market.

As the Canadian government had full power to license exporters and could withdraw or cancel any exporters license they were in a position to see that the trade was worked on a highly satisfactory basis. These actions by the Canadian government meant that all Canadian milk cows exported to Britain conformed to a degree of official testing, examination, and supervision which was higher and stricter than that applied to any other cows for commercial dairy purposes offered in any market.

### Germans Like Canadian Eels

Hundreds Of Tons Taken From St. Lawrence River Every Year

Canadian eels, yards and yards of them, miles of them, so many in fact that if placed end to end they would turn a Hollywood statistician green with envy, left Montreal in the Canadian Pacific fast cargo liner Beaverford. In about two weeks, cut up into millions of small pieces, they were melting in the mouths of German gourmets.

Hundreds of tons of eels taken from the mud in the St. Lawrence off the Isle of Orleans near Quebec, are shipped to Germany each year. The business reaches a peak at this season and this shipment on the Beaverford was a record one as actually one hundred tons weight of barreled eels left in the Hamburg-bound liner.

Hardly individuals, it is claimed that the eels though frozen are still alive in the barrels, but do not show signs of life. It might be said that they are hibernating. Aboard ship they are placed in refrigerator space having a temperature of 20 below zero, which probably induces a chronic state of hibernation. The Canadian eels formed part of a cargo of over 6,000 tons weight the Beaverford took to London and Hamburg.

### Integrated Noise Meter

Instrument Registers Amount Of Noise Person Has Been Subjected To

An integrated noise meter designed by Dr. F. B. Haynes, of the Virginia Polytechnic Institute, is described by him in the current issue of "The Review of Scientific Instruments." This meter will measure and record the total amount of noise a person has been subjected to in any given length of time, just as the gas meter tells how much gas has been consumed. It operates very much like an ordinary watt-hour electric meter. A microphone picks up the noise and transforms it to an electric current of proportional intensity. This controls the grid bias on an amplifying tube and lets varying amounts of "plate current" flow through a watt meter which continuously adds up the varying amounts of current which correspond to the noise picked up by the microphone. The noise unit is the "decibel."

British chemists find that gases used to preserve fruits in storage can be used for meats, notably in shipment of meat from Australia to England.

She—Some people don't know what's good for them in this world. He—And some people do know, but haven't the price to get it.

"Australia is now Canada's third best world market, ranking immediately after the United Kingdom and the United States. The trade balance between the two Dominions is three to one in Canada's favor," said L. R. Macgregor, Toronto, Australian trade commissioner to Canada.

During the last Canadian fiscal year ended March 31, Australia's purchases from Canada included 304 million feet of lumber; 12 million pounds of canned salmon; 100,000 tons of newsprint and 18,189 automobiles, Mr. Macgregor pointed out. At the same time, Canada bought from Australia 15,000 tons of raisins and currants; 100,000 cases of canned fruits; 71,000 gallons of wine; 4,000,000 pounds of wool and 300,000 tons of raw sugar.

The active trade balance for Canada was attributable to the trade agreements of 1931, which in themselves were an extension of the trade agreements negotiated in 1925 by Hon. Mr. Robb, he said.

Australia was coming out of the depression at the time, Mr. Macgregor said. Unemployment among trade unionists which fell to 30 per cent in 1932 had now risen to 17 per cent; exports rose from £85,000,000 in 1931 to £99,000,000 in 1934, higher than any year since 1929-30. Practically all business activities were showing improvement.

"Since 1932 any fear that government finances would be allowed to drift has been dissipated by the present plan which was carried out in all provinces. Moreover the control of the London-Australia exchange rate by the Commonwealth bank has meant three and a half years of absolute stability despite the vagaries of sterling."

"In June, 1935, there was an increase in deposits in Australian savings banks of \$35,000,000 over the same date of the previous year. Deposits now total over a billion dollars and the present level has been exceeded only once in the history of savings banks in Australia, 1928 and '29."

### Unemployed Grow Jobs

Raise Su Ku Bolls Which Are Highly Prized By Orientals

Unemployed in Port Credit, Ont., have started a new industry. In place of bewailing competition from Oriental goods made with cheap Chinese labor, they have turned the tables. What is more, they are making a handsome profit doing it.

It all started some 25 years ago, when a number of Chinese started raising Su Ku bolls on the marshes that border the banks of the Credit. For some time they prospered and sold their product, a bulb much prized by their countrymen as a vegetable. For some reason the venture was abandoned and nothing more was heard of it until recently when an unusual hero re-discovered the bulb, still growing profusely. Several unemployed were quick on the pick-up, found they could be sold in quantities to Toronto Orientals and so the industry began.

Village authorities are backing the men in their venture and have placed a ban on Orientals, who might wish to revive the business on their own account. The unemployed, so say the village fathers, shall have undisputed claim to the Su Ku and the profits derived therefrom.

### New Kind Of Flower

Specimen In Blackpool Tower Aquarium Lives On Fish

The latest additions to the Blackpool Tower Aquarium are flowers that live on fish. They are placed in a tidal pool connected to the sea by pipes, and when the victims sail in they open their vivid petals and, wrapping themselves around the fish, suck them in. Most people have heard of flowers that close immediately bees and other insects lodge inside them, and in the tropics there are larger specimens which ensnare small birds and mice. Scientists say that they extract the blood from small animals and birds and eject the carcasses. One, a Javanese flower, lures mice into its mouth and drowns them in fluid. Another kills dogs and even goats with its poisonous fumes.

Mount Maunabo was named years after it disappeared into the earth. Crater Lake, Oregon, rests where once towered this mighty mountain peak.

Ticks can live eight months without water and three years without food, scientists report.

## TRANS-ATLANTIC AIR MAIL PLANS TO BE DISCUSSED

Ottawa.—Conferences designed to determine the best route for a trans-Atlantic airmail and freight service between Canada and Ireland will start here between an inter-departmental committee of Canadian experts and 11 aviation and postal officials from the United Kingdom, Northern Ireland and Newfoundland.

Sir Donald Banks, director-general of the British post office and head of the visiting delegation, disclosed the British government hoped eventually to establish an airmail service to carry letters for three cents apiece. Delegates will have three choices of routes. They may decide to send aeroplanes across the roof of the world—over sub-Arctic and Arctic Canada, Greenland, Iceland, the Faroe Islands and Northern Ireland. This route has been surveyed in part.

They may choose a southerly route from Ireland to Bermuda and from there to Nova Scotia or New Brunswick. Sir Donald said a choice of the Bermuda route would not necessitate New York landings as the Great Circle distances between the islands and New York and the maritimes are practically the same.

The third choice might be a direct jump from Ireland to Newfoundland and Canada.

## Duke's Son Christened

King and Queen Godparents For Prince Edward Of Kent

London.—The first-born son of the Duke and Duchess of Kent was christened Prince Edward George Nicholas Paul Patrick in the private chapel of Buckingham Palace, in the presence of his grandparents, the king and queen.

The ceremony was performed by the Archbishop of Canterbury, using River of Jordan water dipped from the same golden font from which the infant's great-grandfather, King Edward VII, was christened.

Seventh in line of succession to the throne, the king's young grandson will be known generally as "Prince Edward of Kent."

His godparents were the king and queen, the Prince of Wales, Prince Nicholas of Greece—his maternal grandfather—and the Duke of Connaught who was represented at the ceremony by Prince Arthur of Connaught.

## Royal Air Force

Plans Made For Additional Aircraft Construction

London.—A project for additional aircraft construction to bring the strength of the Royal Air Force to a total of about 2,000 aeroplanes by May, 1937, was disclosed by authoritative sources.

A spokesman said orders for about 250 more planes than previously announced were already placed in factories working overtime to turn out military craft.

When the present program has been completed, authorities said, the home defence planes will total 1,500, and the fleet, aviation and overseas units about 700.

The previous total had been set for about 1,950.

## Shepherd From Prairies

Sheep-Dog Skill Is Shown At Royal Winter Fair

Toronto.—A shepherd from the prairies brought down the house at the opening of the Royal Winter Fair.

The crowded Coliseum at the Canadian National Exhibition ground cheered to the echo the display of sheep-dog skill and intelligence given by William H. Martin of Maple Creek, Sask.

The three dogs rounded up sheep and geese, guided by low commands and a faint "hiss" from the shepherd.

## Joins Royal Air Force

Only Boy Accepted From Saskatchewan Is 16 Years Old

Unity, Sask.—John Aedy, a 16-year-old boy who has the distinction of being the only boy in Saskatchewan to be accepted as a cadet in the Royal Air Force is en route for England; where he will attend the R.A.F. school for three years. He is a son of Capt. Aedy, M.C., of Revenue district, and was educated at a country school. The examination set by the air ministry is considered to be exceptionally difficult for a boy of his years.

## War Flyer Under Arrest

German Alleged To Have Spied On British Airports

London.—Dr. Hermann Gortz, German war flyer, was under arrest charged with contravention of the Official Secrets Act and a war office statement indicated another person was sought on a similar charge.

The war office communique said: "The charges against Dr. Gortz are that at Parish Broadstairs and St. Peter's between Sept. 18 and Oct. 23, 1935, he acted in contravention of the Official Secrets Act and that between Sept. 18 and October 24 at Broadstairs he conspired with another person not in custody to commit offences against the same act."

Dr. Gortz was arrested at Harwich on Nov. 8 and held in Brixton jail following preliminary question at Margate. He was alleged to have spied on the Manston airport near Bristols.

The Daily Sketch said his arrest was a sensational development. It stated there was an allegation that Gortz had documents contrary to the Secrets Act.

The newspaper said a beautiful golden-haired young woman, sometimes accompanied him on his frequent trips to England. The girl, understood to be his daughter or his niece, returned to Germany this fall, it was stated.

## New Zealand Trade Pact

Will Encourage Shipment Of Cars From Canada

Ottawa.—With extensive revision of duties on Canadian motor vehicles, including parts, the Canada-New Zealand trade pact expiring next Nov. 24 has been renewed to July 31, 1936. Hon. W. D. Euler, minister of trade and commerce, announced.

The new rates will only become effective next May 1, while further trade negotiations will be carried on between the two countries.

The changes in the New Zealand tariff were made at the request of that country in order to encourage the importation into New Zealand of unassembled cars that the assembling might be done there.

Canadian exports to New Zealand have been increasing steadily from \$3,608,500 in the year 1932 to 1933 to \$7,344,785 in the year 1934 to 1935. In the last eight months alone, exports to New Zealand reached a total of \$4,326,593—an increase of \$800,000 from the corresponding six months of the previous year. The chief item of export was automobiles and parts valued at \$1,000,000.

Imports from New Zealand have also been increasing steadily. In the year 1932 to 1933, the amount was \$969,704. This increased in the year 1934 to 1935 to \$2,534,678.

## Captures Wheat Prize

Royal Winter Fair Award Goes To Alberta Farmer

Toronto.—Howard P. Wright of Aldridge, Alta., won the first major championship in the grain and seed classes of the Royal Winter Fair here. His sample of hard red spring wheat was adjudged the best in the show.

An Ontario grower, Roy C. Chambers of Fenwick, showed the best wheat other than hard red, and may be Wright's chief opponent when the judges decide the grand wheat champions of the fair. Other placings in the wheat classes were not announced with the division champions.

H. G. Neufeld of Coedette, Sask., captured the oats championship. The championship for peas travelled to British Columbia, winner being B. Young of Kokisliak, B.C.

First place in the flax division was captured by William Buchwald of Cardross, Sask., with Nelson Langry of Homewood, Man., second.

John Hamilton of Coaldale, Alta., captured first place with his exhibit of field beans, other than small white, in the grain and seed judging. The Alberta department of agriculture at Brooks, Alta., won second prize in the small white beans competition.

## Women As 'Plane Pilots

Not Generally A Success Opinion Of Flying Instructor

Toronto.—The average woman makes a poor plane pilot in the opinion of Ken Main, chief instructor at the Toronto Flying Club. He admits Amelia Earhart, Ruth Nichols and Amy Molson are exceptions to the rule.

"The biggest fault of women flyers," said Main, "is their poor judgment of speed and distance. If you don't believe this, just ask a woman to estimate the speed of a passing auto or to measure by eye the distance between herself and some object."

## New Era For Farmers

Speaker Visualizes Better Days For Agriculturists

Toronto.—Canada is beginning five or ten years of the greatest progress its agricultural industry has ever seen, declared Hon. Duncan Marshall, Ontario minister of agriculture, speaking to representative farmers and stock raisers from every province, together with prominent guests from the United States and overseas, at the annual dinner of the Royal Agricultural Winter Fair.

"One-third of the wealth of Canada is in the hands of the agricultural interests of the country," said Mr. Marshall. "The men and women behind this great industry have had their hard times, they have been through the lean years of depression. But a new day is dawning for the farmer. Canada is coming into its own as one of the greatest agricultural nations of the world."

## ITALY PLANNING FOOD SUPPLY TO MEET SANCTIONS

Rome.—Premier Mussolini satisfied himself that Italy can feed herself regardless of the economic siege laid down by League of Nations countries opposing his war in Ethiopia.

He approved regulations to limit certain crops whose exportation has been halted by sanctions and to grow others which formerly came from sanctioned countries. The plans affect every one of Italy's 3,646,000 farms.

Details of the program were carefully withheld. The farm plans were made at a secret meeting which three big objectives were outlined:

First, to maintain, and increase, where necessary, production of food-stuffs and fodder.

Second, to increase immediately production of certain things needed by Italian industry in the manufacture of substitutes for articles formerly imported.

Third, to limit certain products, some of which have been exported in the past, and devote the land thus released to crops for home consumption.

Geneva.—Ethiopia served notice on the League of Nations she will make no peace that would permit Italy "to reap the reward of its crime."

Answering Italy's Nov. 11 note to the powers, an Ethiopian note Italy refused to entertain any proposal for settlement of the war that might be based on territorial gains by the Fascist armies.

The protest accused Italy of unjustified aggression perpetrated under the most unfair conditions, military barbarity and oppression and attempts to buy traitors for cash, and charged the invading armies have bombarded defenceless towns, killing women and children.

Italy's northern African army stiffened its defences for an anticipated counter-attack. Officers said thousands of Ethiopians were massing in southern Tigre province and that one column even was marching on Selciet, only eight miles south of Makale.

Reports of decisive Ethiopian victories—but at the cost of hundreds of casualties—reached Addis Ababa from the southern front, where Emperor Haile Selassie encouraged his defenders in person. In one engagement, south of Sasa Bana along the River Fafan, the casualties were said to number more than 150 Italian Somali dead and wounded and more than 300 Ethiopians.

## MAKE UNUSUAL MOVES ON POLITICAL CHESSBOARD

Fate was kind to one former British Labor Cabinet Minister when it allowed him to regain his seat in the House of Commons, but it dealt a totally opposite blow to his former cabinet colleague. Left is former Premier Ramsay MacDonald, who went down to defeat in the General Election, while, right, is the Right Hon. A. V. Alexander, former fellow cabinet minister of Ramsay MacDonald who regained the seat he lost in 1931.

## A BEVERLEY BAXTER

Canadian and former editor of the London Daily Express, who wins seat in British elections.

## Alberta's Finances

New Government Is Working On The Problem

Edmonton.—Addressing the 27th annual convention of Alberta Association of Municipal Districts here, Hon. Charles Cockroft, minister of municipal affairs, stated that the actual deficit of the province for the fiscal year ending March 31, 1936, "will be something over \$9,000,000."

By March 31, 1936, we will have an apparent deficit of \$4,600,000 but that does not include direct or agricultural relief charges, the minister explained in stating problems facing the government.

After stating the estimated deficit for the fiscal year the speaker declared: "I am giving this information so you can see something has got to be done."

The government had obtained the services of R. J. Magor to study a means of decreasing expenditures and increasing revenues without harmful effects, he continued.

"I am pleased to say that after discussing this matter with Mr. Magor we have come to the conclusion that something might be done to correct the ills in the province at the present time," the minister stated.

"It must be obvious to all we would have to increase taxes in order to balance the budget."

The first question was that of refunding debts and in this connection "our information is most encouraging," he said. "We expect to return to the province with encouraging news—encouraging not only to the government but to the cities concerned."

Regarding refunding the minister said: "The element of sanctity of contracts comes in but I am convinced in my own mind that a bond can have no greater value than the market value allows." Loans were being offered as low as one per cent, to-day, he said.

## British Naval Hero

Death Comes To Lord Jellicoe In His 76th Year

London.—Lord Jellicoe, outstanding British naval figure in the Great War, died Nov. 20. Death came to the admiral in his 76th year. He was born Dec. 5, 1859. Lord Jellicoe rose to his greatest fame as commander of the grand fleet at the battle of Jutland in 1916.

The immediate cause of Lord Jellicoe's death was illness contracted Nov. 11 during the Armistice Day ceremony at the cenotaph. All the members of his family, including his wife, were at his bedside when he died in his home in the Kensington district of London.

## Montreal Rioting

Exciting Time At Opening Of Election Campaign

Montreal.—Ripe tomatoes and frozen potatoes were hurled through the windows and into St. James market at the first meeting of the Quebec election campaign to be held in Montreal by Premier Taschereau. By actual count 21 windows were smashed while 15 others were struck by the vegetables thrown by members of a crowd which formed a solid cordon around the outside of the building. Seventeen men were arrested and lodged in the cells.

Most of the missiles were fired at the beginning of the meeting during the speeches of Hon. Renee Vautrin, minister of colonization, and Premier Taschereau. While Hon. Fernand Rinfret, secretary of state, delivered his half-hour speech there was only one break. By that time the crowd outside had been largely dispersed.

A chorus of boos also came from outside of the hall greeted many remarks of the first two speakers. Provincial police inside the hall joined municipal constables outside and cleared the market place of those who failed to give good reason for being there.

In the middle of his speech Premier Taschereau was interrupted by a particularly loud window breaking. "That's all our opponents are good for," he commented—"destruction, nothing constructive."

While there were a few catcalls from inside the hall, it was from the outside the demonstrators led the trouble. Loud-speakers carried the speeches outside the hall and choruses of "invective," "boos" and catcalls punctuated the oratory from within.

Even when the barrage of tomatoes and potatoes was at its height, Premier Taschereau broke into a wide smile when a woman in the audience shouted, "It's not we who don't have the vote, we'd show those gangsters what we think of their methods."

Of the 17 arrested four were released on bail of \$10 while 13 were held over night. All were booked on charges of disturbing the peace.

## TURNER VALLEY OIL FIELDS MAY BE DEVELOPED

Ottawa.—Prospects of a much more intensive development in the Turner Valley oil field in Alberta are being studied by the British American Oil Company, H. H. Bronston, controller of the company, told the tariff board.

He said his company was studying a process for the production of a first grade oil of commercial gasoline from Turner Valley naphtha which, if successful, might result in the closing of British American's refinery at Coutts, Alta., and withdrawal by the company from the Cutbank oil fields in Montana.

At present the company produces crude oil from its properties at Cutbank and pipes it to its refinery at Coutts to supply its customers in western Canada. Mr. Bronston said his company was now interested in Turner Valley in a small way and there was a possibility this interest might develop along lines which would make the importation of crude oil from Montana unnecessary. He declined to give details of the scheme when pressed by J. J. Frawley of the Alberta attorney-general's department.

The tariff board's hearing into an application from Saskatchewan cooperative associations for removal of the present gasoline duty continued with presentation of a brief on behalf of British American Oil. Mr. Bronston was questioned after the brief had been submitted.

Mr. Frawley asked the oil company official why his company needed the duty in-so-far as its Alberta business was concerned. His reply was to outline the prospective development. The Alberta government representative said this proposal was a complete surprise to him and the company should supply more details. At present Alberta was opposed to continuance of tariff protection on gasoline but if that province, with Saskatchewan and part of British Columbia, could be supplied with gasoline by a development at Turner Valley the province might take a different stand.

Mr. Bronston said he was willing to lay all the facts at his disposal before the tariff board and counsel for Alberta and was satisfied they would substantiate his statement. He objected, however, to disclosing them before a public hearing of the board.

## METHODS USED AT STOCK FAIRS ARE DEPLORED

Toronto.—The provincial winter fair at Guelph, Ont., one of the biggest show events in Canada, was held up by George B. Rothwell, Dominion livestock commissioner, as one of the few fairs which did not ignore livestock regulations.

Mr. Rothwell appealed to the 12th annual convention of the Canadian Association of Exhibitors to "clear up a situation that in some cases assumes the dimensions of a racket." He was joined in his attack against unethical showing of cattle at fairs and exhibitions by Hon. F. C. Biggs, Ottawa, of the national livestock records.

"I could tell you the names of fairs and exhibitions in Canada that ignore regulations in regard to registration of livestock and closing dates," Mr. Rothwell said. "The only name I am going to mention is that of a fair which has an estimable record with the national livestock records at Ottawa, and that is the Guelph fair."

Mr. Biggs said thousands of animals have been led into the show rings during the last few years which had no right to be entered in the class they were in and, in some cases, should have been barred from the show. The guilty parties, he said, were not only farmers. "Some of the biggest breeders in Canada have gone wrong when they reached the fair," he said.

## May Balance Budget

Special Financial Advisor Of Alberta

Edmonton.—Balancing of Alberta's budget by March 31, end of the fiscal year, was envisioned by R. J. Magor, special financial adviser to the government, in his first preliminary report to Premier Aberhart.

The cash balance on this year's operations, Mr. Magor reported, will be \$9,546,310.17, the margin of expenditures over revenues.

Anticipating the obtaining of concessions from Ottawa, the decrease of expenditures and the increase of revenues, however, the financial expert said, he had brought the loss to within \$900,000 of balancing. The problem now is to wipe out this deficiency.

Refunding of Alberta's debt, close to \$200,000,000, a resultant saving of an estimated \$3,000,000 a year in interest is among the factors expected to contribute to a balanced budget. This refunding, as well as other projects to decrease the province's expenditures, is one of the chief items to be put before the Dominion government at the Ottawa conference next month.

## New Zealand Treaty

Negotiations With Canada To Further Trade Matters

Ottawa.—Further trade negotiations will be conducted between Canada and New Zealand shortly after New Year. Hon. W. D. Euler, minister of trade and commerce, stated here.

"Canada is accepting New Zealand's invitation to resume trade discussions before the proposed automobile tariff changes are to be put into effect by New Zealand, and negotiations will take place soon after New Year," the minister said.

The Canada-New Zealand pact, extended from Nov. 24 to July 1, 1936, provides for extensive changes in New Zealand's duties on Canadian motor vehicles and parts. Provision is made in the extended agreement that these tariff alterations will not become operative until May 1.

## Delegation From Alberta

Seven Going To Ottawa For Federal-Provincial Conference

Edmonton.—Seven men will be in the Alberta delegation attending the federal-provincial conference at Ottawa, December 8, Premier Aberhart announced.

Leading the party, the premier will be accompanied by Hon. Charles Cockroft, provincial treasurer and minister of municipal affairs; Hon. W. A. Fallow, minister to public works, railways and telephones; Hon. J. W. Hugill, attorney-general; Hon. C. C. Ross, minister of lands and mines; and J. C. Thompson, provincial auditor. In addition, R. J. Magor, eastern business magnate, who is special financial adviser to the Alberta government, will be close by as an expert. He left for the east last Friday.

## The English Language

### Crusade To Maintain The Purity Of The Tongue

Misusing the English language is defiling a living thing of great beauty. It is a corruption that is going on very fast, and to stop the dry rot was the mission Mr. A. P. Herbert set himself when, in Punch, he wrote a series of articles now published as a book called "What a Word!"

His zeal is not the tyranny of the pundit or the pettiness of the pedant, but is rather a craving to preserve the purity in simplicity and the fragrance of the unforced flower. He finds more and more people attempting to write the language, and is perplexed by those who should cultivate its charm polluting its clarity. The blame for this is laid by pedants and purists oftentimes on the press. Heaven alone knows the press sins in the commission of error and bad taste, and cannot defend itself by the plea of always being harried by haste, but it strives to make itself clear, which it apparently does, although its accusing pedants seldom do.

Mr. Herbert collected instances of bad English, but did not have to go to the press to find the worst. He picked these out of the orchards of the on-line and plucked the dullest perhaps from the tangled vines of the learned. He has not had to sneer at the natural errors of the uneducated when he had to boil over at the bad English of the educated. Nor did he have to wail at the writers of letters to the editors when he had to loathe the formal correspondence of government offices and rich corporations. Their stilted jargon and meaningless phrases—their habit to say badly in ten words what they could say better in five—are among the worst defilements of the King's English, which of all, should be the English of us all.

"Your English," says the Times, interpreting the conviction that inspires Mr. Herbert in this crusade—"your English is naught, it appears, unless you drag in horrible great words ending in -ization (you do not, for instance, persuade a man to go to hospital, you motivate him to hospitalization), use verbs as nouns and nouns as adjectives, run prefixes three deep on to any word that offers, and never use one syllable where four will do. The criterion of the joke comes when Mr. Herbert accuses the hard-headed, practical opponents of the study of the classics of being the very people who most frequently use, and therefore misuse, words and phrases of Latin and Greek origin, and thereby corrupt the English which they profess to respect."—Winnipeg Free Press.

### Modern Matchmakers

#### Institution Aids In Finding Husbands For Chinese Women

Family matchmakers, familiar to old China, have a modern counterpart in Shanghai, but the business has passed into the hands of official bureaus and charitable institutions. The new order came to light when the Chapel Benevolent Institution of Shanghai, announced it wanted husbands for 18 girls living in the institution. All the prospective brides were rescued by police from abductors or would-be purchasers.

The girls were "offered for selection" under stringent rules. No prospective husband was allowed to see the girls before submitting an application, with a photograph, to the institution.

Once a man was approved, he was to meet the prospective bride and take his choice. But the chosen girl had to approve her suitor.

#### May Be One Sign

An item from London relates that the world's rarest postage stamp, a one-cent British Guiana, has been placed on sale for \$37,500 and found no buyer. Would it be overanguine if one should venture to hail this as an omen of returning rationality in a disordered world, asks Christian Science Monitor.

#### Collection Of Carvings

A curio shop in Seattle, Wash., has a collection of carvings said to be the smallest in the world. Figures of the Virgin Mary, Christ on the Cross, Confucius, and Buddha on grains of rice are among the collection.

For all the fame of Colorado gold mines, the state's coal production up to 1933 totalled a higher value than the gold.

Steward—"How would you like your breakfast, sir?"

Passenger—"With an anchor on it, if you don't mind."

A bear and 40 wolves were bagged in a hunt within the present city limits of Chicago 100 years ago.

## GALE PLAYS HAVOC WITH BRITISH SHIPPING

This is not a whale, or a strange sea-monster, but the keel of a big dredger which capsized in Falmouth Harbour during a terrific gale around the British Isles recently. The dredger "Bruce" was bound from Newport to Southampton when it was waterlogged during the gale and turned over when it put into the harbour.

### Another Copy Located

#### Newest Discovery Of Diary Of Columbus Reported From Russia

The momentary thrill that shot through book collecting circles with receipt of news dispatches from Moscow telling of the discovery of Christopher Columbus' diary in an obscure Russian museum died a-borning.

The New York Public Library has two such diaries.

And they are worth just about their weight as paper pulp, or perhaps a bit more as amusing literary curiosities.

The library, as a matter of fact, indexes its copies under the heads of "Christopher Columbus, Fiction," and "Fiction, English."

The dispatches said the "diary" was located in a museum at Karpauli. It was written in German and the title page bears the inscription:

"Notebook of Christopher Columbus, written by myself for my son, Diego, Aug. 3, 1492."

The "diary" of which the New York library has two copies is written in German and bears the title "My Secret Log Book" and is illustrated with pen and ink sketches of Indians, tropical landscapes, boats and plants.

Library officials said that "diary" first made its appearance about the time of the Chicago World's Fair of 1893, which was officially known as the Columbus Exposition and commemorated Columbus' discovery of America. Various of the numerous copies have been "discovered" repeatedly since.

The book was apparently calculated to rouse interest in Columbus' voyage of discovery and was published at Dusseldorf, Germany, for an English firm.

It was first issued with a label stating the volumes were "imitated after the original Log-Book fished up on the 14th of August, 1890."

Oddly enough, no indication was given as to where this remarkable angling effort was made.

Library experts regard the "diary" as a publishing curiosity, but said there is not a trace of authenticity in any version yet brought to light.

### Trade With New Zealand

#### Many Things Being Bought From Canada In Larger Quantities

New Zealand is buying from Canada increased quantities of motor vehicles, tires, newspaper, canned fish, silk and artificial silk, piece-goods, flour, gum boots, iron wire, leather footwear, agricultural machinery, cardboard and similar board, and adding machines, a comparison of figures for the first six months of this year as compared with the same period of 1934 shows, according to traffic officials of the Canadian National Steamships, a great portion of the products enumerated being carried in vessels of the line in the direct Canada-Australia-New Zealand service. Canadian canned fish represented 59.1 per cent. of the total imports. More Canadian radio receiving sets and electric stoves were also sold.

Construction contracts awarded throughout Canada during October totalled \$14,925,100, an increase of \$182,000 over the total building permits issued during the previous month.

In Dutch bulb fields, an inspector seeking disease symptoms in the plant leaves carries a huge umbrella, because the conditions show up only in the shade.

### Canada's Tobacco Business

#### Few Years Ago Plant Was Raised Only For Private Consumption

The Montreal Star says: The value of the annual tobacco crop in Ontario as illustrated by the total sales during the two days on which the crop was on the market will surprise most people. More than 20 million pounds have been sold already at prices "well above the appraisal," and there is good reason to believe that the total will be considerably above the eight million dollar valuation put upon the crop in the field by experts.

The interesting thing about it is that this eight million dollars or more goes into Ontario pockets from a crop which was unknown in that province comparatively few years back. Not long ago the only tobacco grown in Ontario was to be found in the gardens of private experimenters whose consumption of their own leaf, cured by their own methods, stamped them as hardy pioneers and persons to be avoided in confined spaces.

Now almost 40 thousand acres of the finest soil in southern Ontario is given up to the scientific cultivation of high-grade tobacco and its curing by modern methods has produced a domestic tobacco, which not only goes into the finest blends for local consumption, but has won for itself a profitable and ready market in Great Britain in competition with foreign leaf which, only a few years ago, had undisputed command of the high-class trade.

Canada's tobacco business—39 million pounds in 1932—is another illustration of what can be done by intelligent enterprise in the face of what appear to be unfavorable conditions. It is within the memory of many a living Canadian when we were told that we could not raise wheat in the "North-West." It takes a very sturdy pessimist to be sure of anything that "can't" be done nowadays.

Salesman—"Tell your mother the vacuum cleaner man is here."

Little Girl (returning shortly)—"Mother says we have no vacuum in the house."

### Use Of Phosphate

#### The Effect Of Phosphate Fertilizer On Grade Of Wheat

In spite of constant increased yields from the use of phosphate fertilizers in certain sections of Western Canada, a criticism has been made that their use resulted in a lowering of the market grade of grain by reducing the size of the kernels.

To determine the truth of this complaint, the point is being studied at the Dominion Experimental Station, Scott, Saskatchewan. Samples have been taken from plots where different rates of phosphate fertilizer were applied on summer-fallow. After determining the weight per bushel of the threshed samples, the kernels were passed through a set of sieves which gave the percentage of kernels in five different sizes. The work on this question to date gives indications that the effect on grade depends on the kind of growing season.

In an average season, the yield, weight per bushel and size of kernels were increased when a moderate rate of phosphate fertilizer was drilled in with the seed. In a season of low yields the weight per bushel was decreased over two pounds per bushel, approximately 60 per cent. of the kernels were in the smaller sizes, but the yield per acre was increased four and a half bushels. In years of late summer frosts such as 1928 and 1935, quite a percentage of the unfertilized crops were seriously damaged with yield and grade materially lowered, while fertilized crops produced higher yields and grades, thus greatly increasing their market value.

The general conclusion is that in areas where phosphate fertilizer is light on land, indicating a certain course, and by others a light carried in a canoe by Indians. L. R. Crawshaw, of the Marine Biological Laboratories, Plymouth, publishes an ingenious explanation in "Nature," the British Scientific weekly. Lights such as Columbus described are produced by a particular type of articulated marine worm found in the waters of this area. The phenomenon is observed only during the third quarter of the moon's cycle, and the moon was in this phase, according to Columbus' records.

Candles used for lighting purposes are 17 times more expensive than electricity.

### AUSTRIAN LEADERS HONOUR DOLFEUS

When a memorial to the late Chancellor Engelbert Dollfuss was unveiled in Vienna, Chancellor Schuschnigg, left, and Prince Ernst von Starhemberg, second from left, whose recent political coup consolidated their powers, were among those who paid tribute to the diminutive leader slain in the 1934 attempt of Nazis to seize control.

## A Mathematical Certainty

### Cooling Monsoons Restore Life To Arid Indian Plains

In India at the end of September people put away umbrellas and raincoats with not merely the hope of conjecture, but the plain mathematical certainty that they will not want them again, even once, before the following mid-June; and that during that time the only bodily moisture will be that induced by the all-pervading heat.

In the London Sphere we read: India is, in its way, a continent, with a continental climate; and an all-seeing Providence has ordained that it shall be hot, or at times hotter, between midwinter with a blue and cloudless sky, and midsummer when the heavens have slowly turned to a heavy canopy of molten yellow brass, the heat increases unchecked. Every scrap of moisture is drawn up out of the soil, and the land where even the rare wind-gusts assuage you with the breath and odor of a brick-kiln, lies parched and baked.

At about the summer solstice, the tremendous upward lift of this superheated air reaches its climax. The equilibrium of the higher atmosphere is upset. An immense void of thinning air is created over the surface of the many thousand squares miles of the land; and the whole weight of heaven bends itself to adjust the balance. The message is flashed out to sea, and right across the Indian ocean to far-away Madagascar the cooler sea-borne air currents halt, face about, and fall-in for the massed attack on India.

Up from the southwest they creep, across the leagues on leagues of ocean, accumulating in their stride the tremendous evaporation caused by air passing swiftly over heated water; till the cloud-masses gather in a dense phalanx and, sweeping onward, burst with the rattle and clatter of massed artillery on the unprotected coasts.

Throughout India life springs up once more. Seeds germinate. Crops and every growing thing, leap to answer the torrent of moisture. As you watch, you can almost see them grow. Men, beasts, birds, reptiles, stand in the downpour soaking in new life.

By mid-September the attack begins to abate, and by October the rain has dried away in a succession of sullen and reluctant grumbles.

### Science Explains Mystery

#### Light Columbus Saw Was Luminous Matter Emitted By Worms

The night before Columbus discovered America he saw a light that appeared like that of a candle some distance away in the darkness. The light alternately raised and lowered and finally disappeared, according to the logbook of Columbus' ship. This entry has caused much speculation. By some persons it is interpreted as a light on land, indicating a certain course, and by others a light carried in a canoe by Indians. L. R. Crawshaw, of the Marine Biological Laboratories, Plymouth, publishes an ingenious explanation in "Nature," the British Scientific weekly. Lights such as Columbus described are produced by a particular type of articulated marine worm found in the waters of this area. The phenomenon is observed only during the third quarter of the moon's cycle, and the moon was in this phase, according to Columbus' records.

### Too Many Orders

The sergeant drilling the awkward squad was beginning to lose his temper.

"Attention," he ordered. "About turn!" quickly followed other commands until he finally roared: "As you were!"

All shrank back into the last position except Private Jones, who stood gazing vacantly round the squad. "Jones," snapped the sergeant. "I said, 'As you were.'"

"I know, sergeant," replied the unhappy private, "but how was I I forgot."

### Barley Values

Striving to obtain accurate information regarding the agronomic values and maturing qualities of barley varieties, a barley variety testing project is being sponsored by the Saskatchewan Wheat Pool in co-operation with the National Barley Committee, the University of Saskatchewan and the Dominion Experimental Farms.

### Turkey To Resemble Duck

Streamlined turkey that looks like a duck is the goal of United States Department of Agriculture scientists in a new series of experiments. The experiments seek a turkey with bad news for Willie—smaller legs, with—good news for dad—broader backs—and with great news for the entire family—plump-breasted bodies.

## Proving Of Seed Stocks

### Elite Seed Verified For Purity Every Four Years

The rules and regulations of the Canadian Seed Growers Association make it necessary for growers of Elite stock seed to have their seed stocks verified for purity every four years, or more frequently if necessary. Each spring the secretary of the association gathers in the seed stocks of the various growers who have Elite seed, and half of each sample is given a number and submitted to the Cereal Division, Central Experimental Farm, Ottawa for a growing test.

At the Central Farm, these samples are sown in five-row plots which provide on the average 1,300 to 1,500 plants for testing. As soon as the plants are tall to eight inches high, the assistant in charge of the particular crop involved, wheat, oats or barley, as the case may be, inspects the plots and notes characters in the plot which may be abnormal for the variety concerned. Then, at one week intervals until harvest time, and particularly just after heading, close watch is kept on the plots and any "off-type" or suspicious heads are tagged with small labels. These so-called "off-type" may not really be off-type, but, from experience, it has been found that suspicious heads are often the start of a break-up in the strain. Then, at harvest time, any heads marked suspect in the season are pulled and put away for close, critical examination in the laboratory. The centre row of each plot is pulled and the heads kept for reference, should any question with regard to the plot arise.

The marked heads are then critically examined and a detailed report submitted on each test to the executive of the association. As a further test, not only of the grower's seed stock, but also of the one responsible for verifying the seed, the seed from the suspicious, marked heads is sown and a check made on the resulting progeny. This test is very interesting in that suspicious are frequently justified, and one finds that a diversity of types result from this test.

The Cereal Division is glad to report that, during the past few years, due to these frequent tests, there are very few off-type heads found, compared to the number of heads pertaining to the verification test. This was first originated about 1924. The quality and purity of most stocks is above reproach, and it is only in the odd case where by accident some immature seed is in or where natural crossing produces irregularities.—G. C. Frazer, Central Experimental Farm, Ottawa.

### Occidental Typewriting

#### Japanese Stenographers Have 2,000 Characters To Work With

Stenographers who feel that the 47 keys of the standard Occidental system are plenty to punch, should be glad that they do not follow their vocation in Japan.

The Japanese manipulators of typewriters have to struggle with a keyboard having 2,000 characters to be picked out by hand.

The slugs have individual compartments in a sliding tray. The stenographer must press a knob in picking out those individual signs of the Katakana or Hiragana forms.

Characters which once were pictured have been reduced to their almost formless on the typewriter and now represent ideas when placed in sound and thought sequence.

When the knob is moved directly over the selected character, pressure is exerted. A metal arm pushes the type upward, passes its face across a tiny ink roller and against the paper which is roled on a drum. The drum shifts and revolves as the letter progresses.

The typewriters cost about the same as an English-language machine.

### New Soil Laboratory

The new Dominion Soil Laboratory at Swift Current, Saskatchewan, is under present construction. The laboratory will be the headquarters for investigations in connection with soil drifting, moisture conservation, and all other problems affecting field crop production in the Prairie Provinces.

### Farmer Honoured

For outstanding achievement as a farmer, home-builder and citizen, Joseph Stringer, dairy farmer of Grenfell, has been awarded the Master Farmer gold medal and certificate by a rural magazine published at Winnipeg.

Moscow is to have a library to hold 10,000 books as a memorial to Maxim Gorky.

A queen bee can lay twice her own weight in eggs daily.

## Don't Guess But Know

Whether the "Pain" Remedy You Use is SAFE?

Don't Entrust Your Own or Your Family's Well-Being to Unknown Preparations

THE person to ask whether the preparation you or your family are taking for the relief of headaches is SAFE to use regularly is your family doctor. Ask him particularly about "ASPIRIN".

He will tell you that before the discovery of "Aspirin" most "pain" remedies were advised against by physicians as bad for the stomach and, often, for the heart. Which is food for thought if you seek quick, safe relief.

Scientists rate "Aspirin" among the fastest methods yet discovered for the relief of headaches and the pains of rheumatism, neuritis and neuralgia. And the experience of millions of users has proved it safe for the average person to use regularly. In your own interest remember this.

"Aspirin" Tablets are made in Canada. "Aspirin" is the registered trademark of the Bayer Company Limited. Look for the name Bayer in the form of a cross on every tablet.

Don't Demand and Get "ASPIRIN"

## MISS ALADDIN

—By—  
Christine Whiting Parmenter  
Author of  
"One Wide River To Cross"  
"The Unknown Port", Etc.

CHAPTER XXIV.—Continued

The girl spoke softly, her dimple showing for a moment, but to her surprise Jack answered in all seriousness: "After what you did during the blizzard? You know better, sis. But Matt's different from some boys, and I wouldn't like to think you'd hurt him."

Said Nancy, endeavoring to make her voice sound light: "You talk like Aunt Judy! She imagines that every boy who looks my way has lost his heart!"

"Well," observed Jack, "most any one would think that Matt had; but I never saw him act so happy and keyed up as he did this evening—and last night too. Say! will you ever forget how excited Mr. Adam was over your finding that crucifix? I think they're the finest family I ever knew. So enthusiastic, all of 'em. Do you suppose Dad's Mother'll let me come back next winter? With Mark in California studying forestry they'll be sort of help here at the ranch; and gee! I'd like it more'n anything!"

"I'll say a good word for you," promised his sister; and then: "Get back to bed, Jack. We must be up in good season, and it's long past midnight."

Despite her wakefulness, Nancy was up early next morning, though not so early as Matthew Adam, who had, according to Aurora, delivered milk at the Tubbs before she was out of bed.

"He spoke through the window," she related, "and almost frightened Victor into a collapse. And then I was to tell Jack to be ready to ride down on the truck along with the trunks, and Mark and Luke and John (young John, I mean) and Mary Taylor and Juanita. I told him it would look like a straw ride, but he said, 'Who

cares?' I'll have to admit that for a fellow who's sweet on a girl that's gone two thousand miles away where he'll likely never lay eyes on her again, Matthew Adam looked pretty well resigned. And not more'n three days ago he resembled a man just comin' from the cemetery after buryin' his last relation. He's to drive the Ford with his father and mother and Miss Columbine and you, Nancy. I declare, if I wasn't quite so fleshy I'd squeeze in between on the front seat and go too."

"Why not go down on the truck?" suggested Miss Columbine, emerging from her bedroom.

"Among all them trunks and young folks and milk cans," retorted the good woman. "No thank you, Miss Columbine, I have my pride, and there's house cleanin' to do even if you are going home with Eve Adam for over Sunday. I must say it was real considerate of Eve to ask me, for this house'll seem about as cheerful as the tomb till we get used to it. Well" (she sighed mournfully), "the last breakfast is ready, and you'd better eat if you've any appetites, which I haven't any more. A cup of coffee and four doughnuts was all I could get down this mornin'. I've took the liberty of inviting Victor Tubbs to dinner, Miss Columbine. I need food, and goodness knows I couldn't eat a bite if I was to be here alone."

The truck was gone at last, leaving Aurora flattered and rosy at Jack's farewell talks.

"It's just as well," she said, waving her apron as a last salute, "that Victor wasn't here to see. He's a scowling, Nancy, after more than 30 years of married life; and though Jack didn't mean nothin' in the world by kissin' me good-bye, Victor Tubbs might have misunderstood."

"Which proves that there's no fool like an old fool," declared Miss Columbine tartly. "Here comes the Ford, Aurora. I'd rather have Mark Adam drive us down the pass, but no doubt Matthew will be careful with his load of old folks. Where are you going, Nancy? I thought everything had been brought down."

"I must have one last look at the view from my tower," the girl replied, laughing; but once in the familiar room she tip-toed to a carefully closed door and drew forth something she had hidden.

"Will you send Matt up to get my suitcase, Aurora?" she called with charming innocence from the head of the steep stairs. "Those stupid boys have overlooked it."

The last ride down the historic pass was over. The station came into view, with an impatient "delegation," as Jack called it, on the platform. All too soon a gigantic engine roared past, waving crowd, and slowly stopped; while, dazed and breathless, Nancy found herself mounting steps into the Pullman, a dusky porter armed with luggage leading her on, and Jack, behind, stopping to call something to somebody.

"Section eight. This way, lady." From her window Nancy looked out upon a sort of composite picture of that friendly gathering. Then, as the wheels turned, she caught the glimpse her eyes were seeking: Cousin Columbine in hurried midday, with Matt close by, bareheaded as she had seen him first—his hand slipped through the old lady's arm protectively.

Dear Matt! She'd forgotten to tell him to look out for Cousin Columbine, but he knew. Something tightened in Nancy's throat. The landscape blurred. Then Jack was saying:

"Thank heaven that's over! I never felt so conspicuous in my life. Did you kiss every member of the Adam family? I donno but I did! I'm sure I kissed Juanita Tubbs—by mistake, of course. And I believe I must have kissed Cousin Columbine three times! Isn't she the dandiest old sport, Nancy? Kept a stiff upper lip right to the last minute, but I miss my guess if she didn't want to bawl. Made me feel bad just to look at her. But some one will understand and cheer her up, sis. Of course somebody will!"

Jack was right. As the wheels moved faster and Miss Columbine's steady lip began to tremble, a firm young hand drew her away, back from the crowd that still stared stupidly, it seemed, at the departing train.

"Listen," said Matthew. "Li-listen, Miss Columbine. I'm real quite as awful as it seems, having her go. I promised not to tell even Mother till—till Nancy got home and could tell her; but she left a note for you in—in case you seemed too lonely; and anyway, I'll probably explode if I don't tell some one, so—so you see. . . ."

This was the old, shy Matthew, hesitating as if there were no words with which to say this thing; but as she glanced up, puzzled, Columbine Nelson surprised a light upon his face that startled her.

"What are you trying to tell me,

## 4 to 5 TIMES More Quickly Digested than Cod Liver Oil

Tired, jaded appetites need the stimulation of Cod Liver Oil. Scott's Emulsion helps give you a healthy, normal appetite PLUS added digestibility and vitality because it is an emulsified Cod Liver Oil in a solution of bone-building Hypophosphites of Lime and Soda. PLUS VALUES you get only in Scott's Emulsion.

## SCOTT'S EMULSION

THE DIGESTIBLE COD LIVER OIL WITH THE PLUS VALUES FOR SALE BY YOUR DRUGGIST

Matthew Adam?" she demanded brusquely. "Stop stumbling over your words like that. I'm not a stranger. Don't keep me on tenterhooks a minute longer or I'll do the exploding. What are you trying to say?"

And at the reappearance of her own brisk self, Matt laughed, while in the face and eyes of an astonished baggage-man, he caught the oddly-attired lady in a bear-like hug.

"Only that Nance is coming back," he told her joyously. "And—next time, Miss Columbine, she'll come—to stay!"

The End.

## A NEW SERIAL STORY

Arrangements have been completed for presenting to our readers a new serial entitled "Fleming's Folly," by that well-known writer, Lawrence A. Kestling. This is an absorbing and exciting story of the western plains, and those who follow the installments as they appear each week, will be thrilled by the intense situations. This story will be commenced in an early issue. Be sure that you do not miss the opening chapter.

## IN NEXT ISSUE

### New Death Ray

Designed To Use Against Insect Pests, Could Kill Human Beings. A "death ray" designed for use against insect pests but conceivably capable of being amplified to kill human beings was described at Baltimore to 150 scientists.

At the meeting of the eastern branch of the American Association of Economic Entomologists, Dr. Thomas J. Headlee, professor of entomology at Rutgers University, explained that "sterilization" of insects by "radio waves" requires no more than a "couple of seconds." Animals, he said, develop heat more rapidly than do plants, so it is possible to kill the insects by heat before the plants develop sufficient heat to harm themselves.

His apparatus consists of an electrostatic field confined by two electrodes; by rapid oscillation of an 8,000-volt energy between the electrodes, he has killed insects. The electrodes change from positive to negative at a rate of 50,000,000 times a minute, Dr. Headlee said.

### Substitutes For Food

#### People in Hungary Are Buying

#### Feces And Crows

At the market at Keesemet (Hungary) crows are on sale, where they are fetching as much as three cents each. They are bought by the poor who make them into a form of "chicken broth." Feces are also being sold by the farmers at a shilling a head. Never since the war have the inhabitants of this wealthy district been forced by hard times to resort to such substitutes for food.

The cemeteries of London total in area six times the size of Hyde Park, which covers 390 acres.

## DOCTORING YOUR DAIRY HERD

Cows aren't machines. They can get sick at any time. But Mrs. E. J. Liniment makes it easy to care for their ills. Mrs. Thos. Bulmer of Lardo, B.C., found one of her herd with a lump in her udder. "I rubbed it with Minard's Liniment," she says, "and it soon got better." Minard's is best for Cuts, Bruises, Colds, Disasters, etc., and equally good in stable or in house. Well named "King of Pain".

## Egypt Will Be Guarded

Britain Will Defend Country Against Any Foreign Attack

Having confidence in the League of Nations to enforce the rights of small nations, Egypt demanded independence from Britain and the removal of British troops from the Nile valley. This she has had for the last 16 years.

However, Egypt did not realize at the time, that her territory will always be coveted, as a key position for any country aiming at naval supremacy in the Mediterranean, African colonies, or mid-Eastern interests. The Suez canal is partly responsible for this. But Napoleon considered Egypt the corner stone of his enterprise, when he dreamed of Eastern conquests, and that was 60 years before the canal was built.

Now an Italian force numbering over 30,000 is on the Libyan border and a vast army is near the Sudan frontier. Egypt would have good reason to worry were it not for the clause in the treaty of 1922, by which Great Britain made herself guardian of Egypt against foreign aggression.

Facts speak plainer than poets and the Egyptians realize that the day is passed when a small nation can exist without the fear of aggression from great powers.

Signor Mussolini is quite candid in telling the world, they want Abyssinia for their surplus population and trade in raw materials. The most violently Anglophobe Egyptian cannot accuse Britain in exploiting his country along these lines, as there has never been any British colonization in Egypt. British firms compete on equal footing with concessions.

The present state of affairs has brought the Egyptians and British together, as they see their interests are mutual.

## Swedish Economy Program

Request \$2,500,000 For Expansion Of

### Electrified Railroad System

The Swedish State Railways Administration Board has requested 15,000,000 kronor (about \$7,500,000) from the government for the next fiscal year, of which some 10,000,000 kronor (about \$2,500,000) will be used to expand its electrified railroad system. Construction will cover mainly additions to trunk lines and electrification of minor roads and spurs. All main lines on which such traffic is economically feasible already have been changed from steam.

At the beginning of 1935 electrified operation was totalled 1,331 miles. The expansion program calls for further electrification of 679 miles, of which 230 miles will be completed during 1935. The main reasons for this program have been economy in cost of operation, present cheapness of money and material, relief of unemployment and a greater independence from imported coal.

Electrification of Sweden's principal railroad, 383 miles from Stockholm to Malmo, in the south, was completed October 1, 1935. Work on the 265-mile line from Stockholm to Gothenburg, on the west coast, was started in 1923 and completed in 1928 at a cost of 44,000,000 kronor.

Part of the line that runs north from Stockholm toward Lapland has been electrified. The new power will be installed only as far as Anga, where the north and south lines strikes an east-west line that crosses the Scandinavian peninsula from Sundval, in Sweden, to Trondheim, in Norway. After that will come completion of the west coast line from Malmo to Gothenburg, and this work may later be extended as far as Oslo, the capital of Norway.

## Pedigree Registrations

For the first ten months of 1935, the total number of pedigree registrations with the Canadian National Live Stock Records, Ottawa, approved by the Dominion Minister of Agriculture, was 59,175, compared with 58,457 in the corresponding period of 1934. Included in the 1935 registrations are 2,904 horses, 28,285 cattle, 6,847 sheep, 5,724 swine, and 1,213 poultry.

## High Grade Barley

About 500,000 bushels of high grade barley have been placed in storage at Calgary by a malting company. Another million bushels is now being collected. Much of the present stock has been secured from growers who utilized special seed put out by the company in the spring.

Of the total of 314,108 farms in Western Canada, 222,991 or 71 per cent, keep 1,310,088 head of milch cows.

Squirrels use their tails for parachutes in long jumps.

### Phenomenal Doll Sales

Publicity Was Large Factor In The Success Of These Toys

Dolls have been the outstanding best sellers in the toy sections of departmental stores in the United States this year, according to national survey reports of toy world. Shirley Temple dolls, Dionne quintuplets and fairy princess dolls, the latter prompted by Colleen Moore's fairy doll house now touring the country, have won first place in over-the-counter sales.

Needless to say, the newspaper, movie and magazine publicity has been a big factor in the success of these toys. As a result of this year's phenomenal doll sales, the stores also report a new demand for doll clothes and accessories. Velocipedes and bicycles held a firm place during the summer months and are expected to maintain a strong position with Santa Claus this Christmas.

The four best selling games of the past month, according to the survey, were "Monopoly," "Finance," "Banded Parcheesi" and "Badminton," all made by different manufacturers.

### Old Chief Enters Movies

#### Aged Indian Dresses In Ceremonial Costume And Dances Sun Dance

Chief David, 109-year-old Saanich Indian of Vancouver Island, danced his way into the movies recently. When cameramen making a picture there inquired for someone who could interpret the ancient sun dance of the tribe, this grizzled old chief put on his ceremonial headgear and granted his readiness to begin.

He went through the difficult movements of the dance without faltering. Then he told about his boyhood—how he had watched his tribesmen attack old Fort Victoria back in 1845.

### Japan Looking For Tourists

#### Plans To Spend Large Sum On Advertising Campaign

Japan plans to attract more foreign tourists to the country. The Bureau of Tourist Industry in Tokyo intends to spend nearly \$300,000 on an extensive advertising campaign in the next fiscal year. Offices will be established in Chicago, Paris and Shanghai. Publicity films will be circulated and advertisements placed in newspapers and magazines throughout the world.

### Reduction For Families

Family season tickets for air travel in Europe are now being issued by aviation companies. Tickets are valid for either four months or a year. A family consisting of a man, his wife and two children under 21 may obtain marked reductions in fares.

One Chinese army compels its soldiers to be thrifty. Ten per cent of the rate pay must be saved monthly, and none is exempt.

The Australian government will send a trade delegation to India.

## Little Helps For This Week

For I reckon the sufferings of this present time are not worthy to be compared with the glory that shall be revealed in us. Romans 8:18.

Believest thou in eternal things? Thou knowest in thy inmost heart Thou art not clay, thy soul hath wings. And what thou seest is but part.

Every contradiction of our will, every little ailment, every petty disappointment, will it we take it patiently become a blessing. So, walking on earth we may be in heaven; the ill-temper of others, the slights of the world, the daily accidents with which God hath mercifully strewn our path, instead of ruffling or disturbing our peace may cause His peace to be shed abroad in our hearts abundantly.

### International Language

Weather Men Adopt Program Unifying Means Of Exchanging Reports

An international language for the weather, made up of signs and figures instead of words, so as to avoid the confusion of varied national languages, is to become uniform for the world's weather man, W. R. Gregg, chief of the United States Weather Bureau, asserted recently.

Returning from Warsaw, he reported that the International Meteorological Organization at its eighth meeting there, with representatives of 42 countries present, adopted a program for unification of codes, symbols and units in the exchange of weather reports.

The maps on which daily weather forecasts are based will look alike the world over. A black dot will mean light rain or drizzle, a star will mean light snow, and a plain circle will mean clear, cloudless skies on every weather map, whether the observers supplying data for it speak English, French, Russian, Chinese, Arabic or any other language.

### Accepts New Office

Lady Tweedsmuir, wife of the Governor-General, has accepted the office of Grand Patroness of the Canadian National Poppy Campaign. In so doing Her Excellency follows the precedents of the Countess of Beesborough and Lady Willington.

Lighthouses are built round to present less surface resistance to waves and wind.

## Instant Relief From ITCHING

Are you tormented with the itching tortures of eruptions, eczema, scales, rashes or other skin afflictions? For quick and happy relief use pure, cooling, antiseptic, liquid D. D. Prescription. Its gentle oils soothe the irritated and inflamed skin, dissolving nature itself to heal the disorder. No fumes—no greasy crust, greasy and stinging—dries up almost immediately. Stops the most intense itching instantly. A 50c trial bottle, drug stores, or write for it—no money back. D. D. Prescription is made by the OWNERS OF ITALIAN BALM.

### Local News

Mrs. E. Mitchell has returned from a business trip to Seattle, Wash.

Mrs. J. Scott of Olds was a visitor in town between trains on Tuesday.

Miss Wilda Laut had as her guest over the week-end, Miss Donna Laut, of Calgary.

Mr. Walter Scheidt, prominent farmer of Didsbury, was a caller at the Chronicle Office on Monday.

All ex-service men are requested to attend the Legion meeting on Saturday at 2.00 p.m. Nomination of officers for 1936.

Mrs. A. Cruickshank, Miss Florence Cruickshank J. Cumming and J. A. McFadyen, were city visitors on Friday.

The Ladies Aid of the United Church will hold a tea and sale of home cooking and work on Saturday afternoon November 30th.

Mrs. F. Ingham of Madden, who has been visiting her daughter Mrs. H.E. Davis of Airdrie for the past week, returned to her home on Tuesday.

Rev. Dr. Powell Superintendent of Missions in the Province for the United Church of Canada, and Mrs. Powell, were visitors in town this week, calling at the home of Mr. and Mrs. M. N. Jones.

Mrs. Young of MacLeod who has been visiting her daughter Mrs. Baird and grandson Master Baird of Edmonton, spent the first part of the week with her mother, Mrs. McCrory.

Among those in Calgary on Tuesday were: Mr. and Mrs. G. Murdoch Mr. and Mrs. W. D. McCool, Mr. and Mrs. L. Ableman, Miss Edna Ableman, J. Collins and Miss Helen Willis.

Mayor Andrew Davison of Calgary was re-elected last week for his fourth term, turning aside the threat of his social credit opponent W. R. Herbert as well as the veteran labor leader, Alderman F. J. White.

Mr. and Mrs. T. Tredaway were visitors to Calgary on Friday. Tom took advantage of the opportunity and checked up on Board of Trade matters with John Hanna of the Calgary Board of Trade.

Councillor George Ainscough attended the Convention of Rural Municipalities in Edmonton last week. Reeve A. Gough and Councillor G. Haug of Carstairs also attended.

Don't forget the big dance at the East Community Hall on Friday. Also reserve the date December 27 for the "Lucky Ticket Dance". Over forty valuable prizes to be given away. Get your tickets early from one of the sales ladies.

Mr. A.E. Edlund received word on Saturday, of the death of his Uncle, Otto Edlund of Claresholm age 58. Interment was made in the Claresholm cemetery.

The late Mr. Edlund was an old timer in the Claresholm District, having moved there in 1902.

Frank Mossop became so enthused over the bridge games or the dancing on Monday evening, that it was not until after he was snugly tucked in bed in the small morning hours, he remembered that the post office door had not been locked for the night. Mrs. Mossop says another chinook developed in a very short time.

Bennie (Moose) McLeod returned to town on Monday from Drumheller where he had unsuccessfully tried out for a position on their hockey team. Bennie was the last player to be let out. He was competing against local boys which made it plenty tough but in these days the home product must be considered. Bennie says he may get a chance at a later date.

### LOCAL NEWS

J.M. Williams is sporting around in his new Ford V 8 Coupe.

At the request of his cotuit, J.J. O'Connor, Mr. Arthur Heywood's trial was set over from Saturday until next Friday, November 29th, at 10 a.m.

Just received word from "Bill" and he says he is feeling about the same but is surely enjoying some wonderful sights.

F.D. Parker of Madden, was in town today flat broke and looking rather lonely. He found the "rendevous" deserted and in gloomy silence. Frank says Crossfield without Hughie is not what it used to be.

It pays to advertise your goods. Last week these columns carried a 35 cent ad and the goods were sold in less than twelve hours. It will do the same for you if you give it a chance. What have you got to sell? What do you want to buy?

Alfred Sorken of Killam appeared before A. W. Gordon P. M. in the R.C.M.P. headquarters, Calgary last Friday, on a charge of reckless driving, and after hearing the evidence was found guilty and fined \$15.00 and costs.

### BIRTHS

Born—on Wednesday Nov. 27th, to Mr. and Mrs. Fay Stone at the Collins Nursing Home, a son.

Born—on Tuesday Nov. 26th, to Mr. and Mrs. H. Jamieson at the Collins Nursing Home, a son.

The warm spell that started last week is surely welcome but it has put an end to the curling for the time being. The thaw however will help the roads which were bad.

### Dog Pound Notes

Contributed

The dance at Summit Hill last Friday was largely attended.

There was a box social at Water Valley put on by the Bituma school in aid of the Xmas concert.

There is going to be a play at Cremona on November 29th.

Dog Pound Xmas concert will be held on December 19th.

The Dog Pound School children are selling tickets on a box of chocolates in aid of the Junior Red Cross.
